- TECHNOLOGY

How did we spark into life?

Firstly we would like to thank you for your interest in our product range. Since the formation of Firebelly in 1999 by its former owner Firebelly Stoves has seen considerable growth since we took over the company in 2003.

We structured the company and moved to a larger manufacturing facility in Halifax, West Yorkshire.

Firebelly had, since 1999, been selling direct to customers via the internet resulting in sales of approximately 80 stoves per annum. As part of the company restructure we made the decision to change the sales and marketing strategy of the business. We began to aim our products at retail agents throughout the UK. We now have over 120 registered retailers throughout the UK and Ireland as well as representatives in the Netherlands, Japan, and New Zealand, resulting in sales in excess of 3500 units per annum.

We pride ourselves on the high level of customer service you will receive before, during and after ordering your Firebelly Stove and we assure you we will not disappoint.

Included in this brochure you will find technical details on our range as well as existing customer and retailer testimonials.

firebelly
WOODSTOVES

the **FB**

Designed and hand-built in the UK, the subtle styling and pleasing proportions of the stove ensure they look at home in any interior. The Firebelly FB stove is the smallest in the Firebelly range. Big window and unfussy design make the fire the focal point. Easy to use controls incorporate an 'airwash' to help keep the window clear. Teknilite fire bricks keep combustion temperatures and thus efficiencies high, and reflect heat through the window into the room.

Output 4kw
Flue; 5" top outlet

find out more: www.firebellystoves.com, email: mail@firebellystoves.com, tel: 01422 347618 fax: 01422 360714

This wood burning stove has a maximum output of 4kw and the flue is 5" (125mm) top outlet. A unique new brand of hand-built wood burning stoves, Firebelly, is breathing fire into living space across the UK. Teeming with the latest technology Firebelly stoves combines this with time-honoured and beautiful design to offer connoisseurs everything they would want from a contemporary wood burner.

firebelly
WOODSTOVES

the **FB1**

Designed and hand built in the UK, the subtle styling and pleasing proportions of the Firebelly stove ensure they look at home in any interior. The huge glass window gives the wood burning flames priority and creates a great ambience when the stove is burning. The unique and uninterrupted 'airshield' system helps maintain the view by keeping the glass panel clean, whilst the side air convection channels distribute the heat evenly and efficiently into the room.

the **FB1**
double sided

Output 6kw
Flue; 5" top or rear outlet

find out more: www.firebellystoves.com, email: mail@firebellystoves.com, tel: 01422 347618 fax: 01422 360714

Heat reflective fire-bricks line every face of the firebox keeping the fire bed at optimum temperature and helping the FB1 achieve its high efficiency rating. The intuitive controls and stay cool door handle make the stove a joy to operate. Options include a wide range of colours, a drop in multifuel kit for burning mineral fuels, and a log box that raises the stove and provides a safe area for log storage underneath.

Output 12kw
Flue; 6" top or rear outlet

find out more: www.firebellystoves.com, email: mail@firebellystoves.com, tel: 01422 347618 fax: 01422 360714

Heat reflective fire-bricks line every face of the firebox keeping the fire bed at optimum temperature and helping the FB2 achieve its high efficiency rating. The intuitive controls and stay cool door handle make the stove a joy to operate. The FB2 is also available as a double sided stove. Options include a wide range of colours, a drop in multifuel kit for burning mineral fuels, and a log box that raises the stove and provides a safe area for log storage underneath.

Options

In addition to the wide range of colours, further options for the FB1 and FB2 stoves include:

Logbox

The log box raises the height of the stove by 300mm and creates a convenient and safe place to store and dry fuel before it is loaded into the fire. The log box simply bolts to the base of the stove.

Multi-fuel kits

The multi-fuel kit includes a grate to raise the fuel enabling combustion air to come up underneath the fire bed. This allows the stove to burn coal and solid briquettes. The grate is made up of durable solid 1" thick grate bars. The position of these grate bars can be rotated over time to ensure even wear and longevity. The generous ashpan slides discreetly between the legs of the stove and is neatly hidden from view when the stove door is locked.

Boiler

The FB2 is available with a 27000btu (8kw0 boiler to be used for central heating and/or domestic hot water. The boiler can be retro fitted to existing fb2s if required.

Double Sided Stoves

The FB2 is also available as a double sided stove, dimensions and output are identical to the standard FB2 but you get twice the view. The logbox and multi-fuel kit are also available for the double sided stoves. Note, the stove door can only be opened on one side.
