*Fire Your Imagination*

Traditional & Contemporary  
Wood & Multi-fuel Stoves

# Premium quality cast iron & steel stoves

Welcome to Stovax, a company that has been dedicated to the development and manufacture of high quality, woodburning and multi-fuel stoves for over 30 years. Today, Stovax is home to one of Europe’s leading ranges of stoves and fireplaces with models and colours to suit all types of interiors.

## Authentic choice

There is nothing like the irresistible ambience of a real Stovax stove. Expertly crafted to be either traditional or contemporary in appearance with the flexibility and convenience required for modern living, they continue to offer discerning homeowners the best of all worlds. Whether you choose woodburning or smokeless fuel options they are clean burning, highly efficient and available in sizes and styles to suit most rooms and living spaces.

## Cast iron or steel

Originally, all heating stoves, such as the Huntingdon range (illustrated on page 14-23), were made from cast iron. Today, in spite of commercial steel production expanding from the late 19th Century onwards, cast iron still remains the material of choice for many premium quality stoves. This is because of the way cast iron diffuses warmth giving maximum radiant heat over a period of time. Moreover, the iron can be cast more thickly in areas where greater strength is needed, whilst additionally allowing attractive designs to be cast into the stove panels.

However, in the 21st Century modern manufacturing technology also permits the use of heavy gauge steel for the body of the stove with cast iron or steel doors and firebox components complementing it.

Accordingly, both the more traditional Stockton range (see pages 30-57) and the contemporary View range (see pages 58-65) combine the advantage of both cast iron and steel, offering superb performance and value for money.

## State-of-the-art Cleanburn technology

Most stoves in this brochure feature Cleanburn technology so they burn logs or solid fuels with outstanding efficiency\*, resulting in more heat delivery into the room and less going up the chimney. It works by introducing pre-heated, secondary air into the firebox to burn the excess hydrocarbons in the smoke. Airwash air also helps keep the window clean, allowing you to enjoy the flames to the full.

## CE Marked and HETAS Accredited

All Stovax Stoves in this brochure, with the exception of the Large Regency and High-output Boilers, are CE marked, and this is shown by the CE mark on their product pages. This means they have been independently tested to exacting European standards for both heating efficiency and emissions. They have also been accredited by HETAS, the UK’s official body recognised by the government to approve solid fuel domestic heating appliances.

## Woodburning and solid fuel

All Stovax stoves are designed either for multi-fuel use, which means they burn logs, smokeless fuels or peat/turf briquettes, or as woodburners only.

Multi-fuel stoves have a riddling grate which allows ash to be riddled into a built-in ashpan to create the optimum conditions for efficient combustion. Woodburners have a fixed grate and no ashpan, since wood burns best on a bed of ashes.

Wood is better in environmental terms as the amount of carbon dioxide released into the atmosphere is approximately the same as that absorbed by the tree during growth. It is also a renewable resource, particularly when derived from plantations and cultivated woodland. For optimum results, we recommend logs should be seasoned for 2 years or more to achieve a moisture content below 20%\*. This will not only give twice the output of freshly felled timber but help avoid a build up of tar in your flue. Furthermore, if you can obtain hardwood logs this is better still, as they will have a greatly increased calorific value of softwoods for the same volume.

\* All efficiencies quoted in this brochure are for seasoned wood with a moisture content of less than 20% or for approved smokeless fuels.

In rural areas, Stovax stoves have a particular advantage as they allow homeowners to burn readily available log supplies from local sources. Indeed, if you are a farmer, smallholder or landowner your fuel could even be free!

Woodburning efficiency can even be achieved in the most urban environments with our extensive range of Smoke Control Area approved stoves. Please see page 5 for further details.

Just as importantly, if you choose a Stovax stove with a boiler option, you can even provide yourself with domestic hot water or run radiators from the same fire. Please see page 4 for further details.

## Five Year Warranty

As outlined on page 76, your Stovax retailer will provide you with a Five Year Casting\* Warranty for all cast iron stoves and the cast iron door of steel stoves. Full details of these warranties are on our website or available upon request.

\*Castings refers to the main carcass of cast iron stoves and the cast iron door in the case of steel stoves. Wearing consumables including baffles, log retainers and grates are not covered by this warranty.

# Stovax boiler stoves for complete home heating

Four models within the Stockton range, along with two contemporary View models, have been specifically designed to supply your domestic hot water and central heating requirements or even augment your existing heating system.

## Hot water, radiators and underfloor heating

Several Stovax woodburning/multi-fuel stoves are designed to be fitted with optional boiler systems and details of these can be found on appropriate pages throughout this brochure. Additionally, Stovax offer a selection of High-output Boiler models that come with the boiler built in.

If you choose a stove with an integral High-output Boiler, you can not only supply yourself with domestic hot water but even run your radiators all from the same appliance.

Alternatively, you can 'link up' a Stovax boiler stove with your conventional oil or gas fuelled central heating system. This 'link up' system will not only reduce reliance on your heating being provided from a single fuel source but, if burning wood, will also make your heating better for our environment through lower carbon emissions. 'Link up' can also connect with gas or oil, sealed heating systems, combi's, underfloor heating, advanced electronic controls and solar panels to make even more flexible systems.

Further information about stoves with boilers is given on pages 66 - 71. Stovax also produces a 'link up' guide which shows how to 'link up' your solid fuel boiler with other heat sources, providing examples of typical arrangements and frequently asked questions. For more details, see our link up technology guide at [www.stovax.com/linkup](http://www.stovax.com/linkup).

# Clean Air Act compliance

# Expert Retailer Network

## Approved for Smoke Control Areas

Most town and city homes are located in Smoke Control Areas as designated by the Clean Air Act 1993. To burn logs on a stove in these locations, the model installed must have been granted exemption from the regulations by the government through DEFRA.

This exemption is given only to appliances which have been independently tested to demonstrate particularly clean burning combustion. Many stoves in this brochure are approved for use in Smoke Control Areas (when the appropriate smoke control kit is fitted and used in accordance with the product operating instructions) and this is shown on each product page. Your Stovax retailer can give you further help and advice.

## See our stoves in your area

We take great care to ensure that our stoves are designed, tested and manufactured to the highest possible quality and safety standards. We are just as concerned to make certain that they are sold and installed correctly so that you enjoy years of pleasure from your purchase.

Accordingly, you will find our products are only available from experienced, independent retailers who will be happy to show you a selection of models locally in their showrooms, often fully operational; discuss your individual requirements both technical (such as sizing the heat output to your room and advising on your flue type) and design; and ensure that you select the most appropriate product for your home. These retailers will also be able to advise on or assist with the installation process as well as help provide any after-sales support and servicing your appliance may require in the future.

Whilst we encourage our retailers to promote fireplace products and their outlets via the internet, we do not believe suitable levels of customer care and satisfaction can be obtained from nationwide online sales and we would strongly recommend that you consider this when undertaking your research and making a purchasing decision. Further, please be aware that we do not offer technical support (beyond our statutory responsibilities) to products bought via nationwide online sales, where this support would normally be offered by one of our qualified, independent retailers.

# Cast iron stoves

Wood and multi-fuel

Every stove in this section is manufactured from cast iron. This is the traditional way of making premium quality stoves due to the way cast iron diffuses heat. Another advantage is that the iron can be cast more thickly in areas where greater strength is needed. It also has sculptural qualities, allowing attractive designs to be cast into the stove panels.

## Airtight Construction

All Stovax stove doors, except the Regency, have airtight seals which permit airflows to be precisely controlled. This allows both the heat output and refuelling frequency to be varied and helps maximise burning efficiency.

## Perfect Flame Control

The triple air system in certain stoves also allows complete control of the flame picture. From a deep glow, with minimal flames, it takes only a few seconds to fill the firebox with swirling flames from the fuel and jets of flame from the Cleanburn ports.

## Enamel Stoves

Enamel is a very thin coating of coloured glass which is fired at over 800°C on to a metal surface. To achieve its translucent and lustrous finish, each casting is especially designed for enamelling and is coated and fired twice. Enamel is an option on many stoves, and available in the three colours shown opposite.

## Triple Air Systems (Cleanburn technology)

Several Stovax stoves incorporate triple air systems to provide a cleaner burn, greater thermal efficiency and control of the flame picture as follows:

- 1** Airwash air is drawn down over the inside of the window to keep the glass clean and clear. It is also used as primary combustion air when burning wood.
- 2** Primary air for use with solid fuel, also used to start wood fires but not normally used once a wood fire is burning.
- 3** Cleanburn secondary air is pre-heated as it passes through a heat exchanger chamber within the firebox. It is then drawn into the smokestream, where it combusts unburnt hydrocarbons to provide a cleaner burn and greater thermal efficiency.

Brunel 1A in Matt Ivory  
burning logs.

# CAST IRON

## Brunel 1A

Ideal for smaller rooms, the Brunel 1A is the smallest stove in the Stovax cast iron range and is designed to fit into a standard 22" high British fireplace. Nonetheless, this model still features airwash to help keep the glass window clear, full multi-fuel capability and an externally operated riddling grate. There is even an option to fit a boiler to supply domestic hot water.

## Brunel 2CB

If you have a little more space available then the Brunel 2CB will bring you the extra heating efficiency and economy of the Stovax Cleanburn System. In fact, this neat little stove incorporates all the state-of-the-art features you would expect from Stovax's advanced designs. For example, the stainless steel baffle warms up more quickly than cast iron so it starts working more rapidly, setting new standards in performance.

Matt Black multi-fuel Huntingdon 40 with clear door and optional short legs burning logs.

# Huntingdon 40

The biggest model in the Huntingdon range – and the most powerful. With up to 9kW of heat output, the 40 is equally at home in both traditional inglenook and modern fireplace settings. You can choose from either the woodburning version with flat cast iron base plate or the multi-fuel version with external riddling and concealed ashpan. Also, do not forget to opt for matching flue pipe, particularly when installing your stove in an inglenook.

Sheraton stove with standard legs, burning logs.

# Sheraton

With clean classical lines and extra large thermal glass windows, the Sheraton is ideal for use in traditional or modern settings. Its rear flue exit will also fit into a standard British fireplace opening. The stove is offered with different grate and thermostat options and a matt black finish. The firebox has a large capacity and uses vermiculite fire bricks; these, together with the advanced aeration system, help to produce a very clean burn with lower environmental pollution. The aeration system also incorporates a very effective airwash system to keep the windows clean.

# CAST IRON

## Regency

Originally patented in 1742 by Benjamin Franklin, the Regency enjoys a pedigree unmatched by any other stove. It was designed at a time when America was still a British colony and its proportions were undoubtedly influenced by Franklin's extended visits to Georgian London. With the doors open and a fire burning, the Regency's large firebox produces the atmosphere of a traditional open fireplace.

The Regency is supplied in three sizes. A pair of polished brass balls are supplied with each stove and a brass rail set is available as an optional accessory. Cast into the side panel of every Regency is a support bracket into which an optional barbecue or bean pot may be fixed. Both of these are manufactured from cast iron and the bean pot is supplied complete with a swinging arm which fits into the support bracket.

# Steel stoves

Wood and multi-fuel

Using cast iron for the airtight doors and main firebox components and heavy gauge steel for the body, the Stovax Stockton and View stove ranges combine the advantages of both steel and cast iron to produce exceptional performance, control over combustion and value for money.

## Stockton Stoves

With eight sizes, each available in four colours, and some models having a further choice of door styles and canopies, there is a Stockton stove to suit any home. Furthermore, there are inset versions, double sided versions and even boiler versions, so whether traditional or modern, large or small, in country or town, burning wood or solid fuel you should find a Stockton to match your setting.

## View Stoves

The View stoves are the latest additions to the Stovax ranges. Available in a choice of three freestanding sizes and an Inset version, the View offers high efficiency heating in ultimate style - perfect for more contemporary homes! You can even achieve whole house heating if you opt for View 7 Inset or View 8 High Output boiler versions, with the capability of supplying up to nine radiators as well as providing a cosy warmth to the room in which they are situated.

Stockton 6

View 5

## Stunning flame effects due to Cleanburn technology

The triple air systems incorporated in Stockton and View stoves combine to provide superb flame control and exceptional views of the fire, so you can also create different ambiances to suit your mood. From a deep glow, with minimal flames, it takes only a few seconds to fill the firebox with swirling flames.

### Design Features

- 1 5mm heavy duty steel body.
- 2 Cast iron airtight door with primary air control lever.
- 3 Cast iron fireback incorporating heat exchanger for Cleanburn system.
- 4 Heated air jets from Cleanburn ports burn hydrocarbons in smoke.
- 5 Airwash control lever to maintain a cleaner glass window.
- 6 Riddling (multi-fuel versions).
- 7 Top or rear flue exit connecting to stove flue pipe.
- 8 Firebrick lining.
- 9 Specially developed, inset boiler versions of Stockton and View also available (not illustrated).
- 10 Universal tool (not illustrated). This fits over the stove handle to provide additional leverage and easier usage when the handle is hot.
- 11 Cleanburn air control ports (not illustrated). These are on the rear of the stove and pre-set in the factory.
- 12 Optional smoke control kit (not illustrated) available on most models to allow them to be used in smoke control areas.

# STEEL

## Stockton 3

The mini stove of the Stockton range is specifically designed to fit neatly into a standard 22" (560mm) high x 16" (405mm) wide British fireplace opening with the chairbrick removed. It has full multi-fuel capability and its compact dimensions make this stove equally suitable for houseboats, summerhouses and garden workshops.

## Stockton 5 Midline

As an alternative to the standard Stockton 5, you can choose the Midline version. This design offers a slightly more integrated, contemporary slant that is particularly suited to modern interiors yet still provides all the benefits of the original model.

- 1 5mm heavy duty steel body.
- 2 Easy fit.
- 3 Specifically designed for 16" or 18" Milner brick openings.
- 4 Cast Iron Side Panels.
- 5 Cast iron air-tight door with primary air control lever.
- 6 Airwash to maintain a cleaner glass window.
- 7 Heated air jets from Cleanburn ports burn hydrocarbons in smoke (internal).
- 8 External riddling lever.

STEEL

# Stockton Milner

The Stockton Milner has been specifically designed to fit into a 16" - 18" wide and 20" - 22" high fireplace without the Milner brick needing to be removed. This means that it can be easily secured and sealed into an existing chimney without the requirement for any building work making it cheaper to install. More efficient than an open fire, the Stockton Milner gives you greater control of combustion, more heat for your money and therefore lower fuel costs. Features of the Stockton Milner include, easy fitting, multi-fuel with external riddling, convection system, Cleanburn and Airwash.

## Stockton 6

The superb combination of size and heating capacity make the standard Stockton 6 particularly versatile. It is produced as a woodburning stove (easily adapted to multi-fuel use with the optional riddling grate kit) or as a dedicated multi-fuel version with external riddling. Alternatively, you can choose the multi-fuel Stockton 6 Highline version (see page 43) - a stove that provides an impressive focal point in kitchens and open plan rooms. All models also accept the optional 'clip-in' steel boiler. This will provide an abundant supply of domestic hot water during the winter months.

## Stockton 7

The Stockton 7 is beautifully proportioned and is a very popular model for medium to larger rooms. Not only an attractive piece of furniture, but when lit it also offers significant heating potential (up to 7kW) whether burning wood or solid fuel. When burning wood, it can take logs up to 12<sup>3/4</sup>" (325mm) in length.

## Stockton 7 Inset Convector

The Stockton range has been developed to offer you an inset convector fireplace with most of the heating advantages of a freestanding Stockton stove. With its cleverly designed Cleanburn and convection systems, the Stockton 7 Inset Convector is around 4 times more efficient than an open fire; giving you greater control of combustion, more heat for your money and lower fuel costs. There is also an integral boiler version which produces up to 30,000 BTU's of hot water (see pages 66 - 69).

# STEEL

## Stockton 8

Little wonder the Stockton 8 is one of our best selling stoves, it offers you more choices and options than any other model. In particular, there is also a space-saving Slimline version (see page 51). This is 3" (75mm) less in depth and, in many cases, means building work will not be required to deepen a fireplace opening. Although shallower, it will still take logs up to 15<sup>3/4</sup>" (400mm) long. The Stockton 8 is produced with a choice of single or double doors. The two door model is opened and closed with a handy cast iron tool (not shown) which locates over the keystone catch, and then rotates to open or close the doors. To complete its versatility, there is also an integral boiler version of the Stockton 8 which produces up to 34,000 BTUs of hot water (see pages 66 - 69).

# STEEL Stockton 8 Inset Convector

Not only will this convector fireplace provide impressive heating capacity compared to a standard open fireplace but it also offers you most of the benefits of our freestanding Stockton 8 Stoves. The Stockton 8 Inset is highly practical too. It has full multi-fuel capability with external riddling, double doors for easy loading/stoking and both Cleanburn and convection systems for greater heating efficiency, whilst the highly effective airwash facility helps ensure you enjoy a clearer view of the fire.

## Stockton Double Sided

Enjoy twice the comfort and twice the view of your fire with a Stockton double sided stove. Using one central chimney, the doors to both the back and the front of the stove are designed to open into adjacent rooms. So, compared to individual stoves in each room, you have less work refuelling and even more of a focal point to your home.

There are two sizes of stove from which to choose – Stockton 8 Double and Stockton 11 Double. Although this double sided configuration does not allow the incorporation of full Cleanburn technology both stoves still include an airwash system to keep the glass clean. The smaller Stockton 8 Double will provide you with a significant heat output, up to 9kW, whilst the Stockton 11 Double produces an even more powerful 11kW. Otherwise, the two models have exactly the same specifications as their single sided equivalents.

Stockton 7HB Inset Boiler Stove.

Stockton 11HB Boiler Stove.

# STEEL High Output Boiler Stoves

Four models (including the new Stockton 14 model shown on page 68) within the Stockton range, along with the View 7HBi and 8HB from the new contemporary View range, have been specifically designed to supply your domestic hot water and central heating requirements or augment your existing heating system via 'link up' technology. Whatever your choice, you will enjoy all the atmosphere of a real fire plus exceptional heating performance throughout your home.

When providing hot water and central heating, each stove is capable of feeding an average 8,000 BTU hot water cylinder and depending on the model, up to 19 radiators. The exact number of radiators will depend upon how many rooms you wish to heat and the sizes of those rooms. Radiators also come in a variety of sizes/capacities. For example, a typical 400mm high x 1000mm wide, single panel radiator requires 2500BTU/hr. You should always consult a qualified solid fuel heating engineer to ensure the stove can meet your requirements.

Alternatively, you can 'link up' a Stovax High Output Boiler with your existing or proposed heating system to reduce your reliance on gas or oil and help decrease

overall heating fuel costs. There are ways to link with conventional oil or gas central heating, gas or oil sealed heating systems, combi boilers, underfloor heating and even solar panels to provide flexible, cost-effective solutions. Stovax produces a 'link up' guide showing typical arrangements and covering some frequently asked questions. You may find it useful to download this from [www.stovax.com/linkup](http://www.stovax.com/linkup) before discussing your requirements with a qualified heating engineer.

All Stovax HB boiler stoves are designed for multi-fuel use and incorporate a riddling grate. This is because smokeless fuels tend to provide greater calorific values. Should you wish to reduce your CO<sub>2</sub> emissions then you can also burn a combination of smokeless fuels and logs together. However, if woodburning only is your preference, you can still achieve good performance but, as logs burn best with slightly different firebox characteristics, we recommend you purchase the optional log tray.

Stockton 8HB Boiler Stove. When burning wood,  
the use of the optional tray is recommended.

Stockton Boiler Stoves Design Features

- 1 5mm and 10mm heavy duty steel body.
- 2 Excellent heat output to water when burning solid fuels or wood.
- 3 4 x 1" BSP boiler tappings for flexible, efficient connection to your hot water circuits.
- 4 Extensive water jacket on 4 sides for maximum transmission of heat to water.
- 5 Highly developed boiler flue baffle system ensures maximum heating efficiency.
- 6 Top or rear flue exit (7HBi top exit only).
- 7 Specially designed reciprocating grate ensures effective removal of ashes.
- 8 Large ash collection tray.
- 9 Discreet external riddling socket.
- 10 Levelling system in each foot to ensure complete stability on uneven surfaces.
- 11 Primary air controls to manually adjust the running temperatures.
- 12 Airwash helps to keep the glass clear and to control the running temperature when burning wood.
- 13 Optional thermostatic control to maintain desired running temperatures (not illustrated).
- 14 Optional woodburning tray (not illustrated).

## View Boiler Stoves

### View Boiler Stove Design Features

- 1 5mm and 8mm heavy duty steel body.
- 2 Excellent heat output to water when burning solid fuels or wood.
- 3 4 x 1" BSP boiler tappings for flexible efficient connection to your hot water circuits.
- 4 Extensive water jacket on 4 sides of stove to ensure maximum transmission of heat to water.
- 5 Highly developed boiler flue baffle system to ensure maximum heating efficiency.
- 6 Top or rear flue exit.
- 7 Specially designed reciprocating grate ensures effective removal of ash from the fuel bed.
- 8 Large ash collection tray.
- 9 Discreet external riddling socket, with removable tool.
- 10 Levelling system to ensure complete stability on uneven surfaces.
- 11 Primary air controls to manually adjust the running temperatures.
- 12 Airwash helps to keep the glass clear and to control the running temperature when burning wood.
- 13 Optional glass top plates in top & rear flue.
- 14 Optional thermostatic control to maintain desired running temperatures (not illustrated).
- 15 Optional woodburning tray (not illustrated).
- 16 Stainless steel door handle, with self-locking function (not illustrated).

Electric Huntingdon 30

Electric Marlborough

# ELECTRIC

## Electric Stoves

Several of the stoves in this brochure are also available as electric versions. Simply plug in and switch on for that 'real fire' look, brought alive with unique VeriFlame™ technology which provides a combination of flame speed and glow level. The individually hand-painted 'logs' perfectly mirror the atmosphere and attraction of a real woodburning stove.

Operation is simple too as the stove's remote control not only allows VeriFlame™ selection but also adjustment of the heat combinations. The amount of heat produced can be altered between 1kW and 2kW depending on the warmth required. You can even enjoy the flames without heat!

For more details, please see the latest 'Electric Fires & Stoves' brochure which features an exciting range of both traditional and contemporary electric fires and stoves. The brochure is available from our sister company, Gazco, and can be requested from your retailer. Alternatively, you can view or download the complete range online by visiting [www.gazco.com](http://www.gazco.com).

### Gas Stoves

Gazco additionally offer a wide selection of traditional and modern gas stoves. Please ask your retailer for details. Alternatively, please visit [www.gazco.com](http://www.gazco.com) to view or download the complete range.

# Flue Pipe

## Matching Matt Black, Matt Ivory & Enamelled Flue Pipe

For the fully colour co-ordinated installation of your Brunel or Huntingdon stove and optimum performance, we offer high quality matt black, gloss black, matt ivory and coloured enamel flue pipes. Brunel 1A, Brunel 2CB, Huntingdon 25 and Huntingdon 28 connect to a 5" flue pipe, while the Brunel 3CB, Huntingdon 30, Huntingdon 35 and Huntingdon 40 connects to a 6" flue pipe. All components are listed in the table.

For Regency and Sheraton flue pipe, please refer to pages 80 - 81.

For View flue pipe, please refer to page 82 - 83.

For Stockton flue pipe, please refer to pages 84 - 90.

Owing to different production processes, we cannot guarantee a perfect match between pipe and stove.

# Accessories, stove care and important technical information

## Care of Your Stove

To help you get the best performance from your stove and keep it in good condition, inside and out, Stovax offers a wide range of cleaning and maintenance products. Stovax also supply a wide variety of fireplace accessories. Your Stovax retailer will be able to give you full details or you may view the complete range at [www.stovax.com](http://www.stovax.com).

## Matt Ivory Stove Paint

Brunel and Huntingdon models, with the Matt Ivory paint colour option, require special attention when cleaning as they have been coated in a high quality paint finish that should give many years of service. However, this colour will mark more easily and require more cleaning than other models. Take care when touching the stove to avoid wiping ash and soot into the paint. Most marks can be removed using a mild soap solution and a clean lint free cloth. The finish can also be refreshed using the aerosol touch up paint (product code 2055) available from your Stovax retailer.

Allow your stove to cool thoroughly before any maintenance or cleaning is undertaken to avoid the risk of burns.

## Product Improvement and Guarantee

Stovax pursues a policy of constant product improvement. Products supplied may therefore differ in specification from those illustrated or described in this brochure, and you should always check the final specification with your Stovax retailer.

Your Stovax retailer will provide you with a Two Year Warranty for your new stove. They will also provide a Five Year Casting\* Warranty for all cast iron stoves and the cast iron door of steel stoves.

For these extended warranties to be valid your stove must have been installed in accordance with the manufacturer's instructions and the second and subsequent year's warranties are dependant on the appliance being serviced within 12 months of installation by an appropriately qualified engineer and annually thereafter. These warranties do not cover certain wearing parts or 'consumables' or the use of unauthorised fuels.

Full details of these warranties are set out to view on our website at [www.stovax.com](http://www.stovax.com).

\*Castings refers to the main carcass of cast iron stoves and the cast iron door in the case of steel stoves.

## Important Safety & Technical Information

We recommend that a HETAS approved installer should undertake a site survey prior to purchase and it is a requirement that any Stovax Stove should be installed by an appropriately qualified HETAS approved installer.

All fires and stoves consume air as they burn. To comply with Building Regulations (Document J) you may need to install a fixed air vent to ensure adequate ventilation. A room vent is not normally required when the air permeability is greater than 5.0m³/hr/m². Your Stovax retailer or HETAS installer will be able to advise on this.

You can also download detailed installation instructions prior to purchase from [www.stovax.com](http://www.stovax.com).

Please note that all parts of these stoves, particularly the glass panel in the door, become extremely hot during operation and can result in serious injury and burns if touched. It is therefore recommended that a fireguard complying with BS 8423:2002 is used in the presence of young children, the elderly or infirm.

# Stove Benches

These versatile steel benches are compatible with the freestanding contemporary View stoves. With four widths and two heights, they offer infinitely greater design possibilities to accommodate your individual styling requirements. You can even use the space beneath for log storage!\*

**Design Features**

- Sturdy steel construction
- Choice of 4 widths and 2 heights
- Durable matt black finish
- High: 450/1000/1200/1400 x 350 x 420mm (wxhxd)
- Low: 450/1000/1200/1400 x 250 x 420mm (wxhxd)
- Proportioned 60mm wide legs
- Allows for central or offset stove positioning

# Dimensions and Flue Pipe

The flue pipe connects your stove to the existing/new chimney system. The chimney system must meet the requirements of Building Regulations (Document J) and the stove fitted in accordance with the detailed installation instructions provided with each unit. You may also download these instructions prior to purchase from [www.stovax.com](http://www.stovax.com).

## Brunel 1A

Weight: 62kg

Connects with 5" flue pipe using:

Size	With door	Without door
1' straight	4504	4500
2' straight	4505	4501
3' straight	4506	4502
1' 3" – 2' 1" (telescopic)		4542
3' 4" – 4' 6" (telescopic)		4540
Tee piece with end cap		4516

For coloured enamel flue pipe codes see page 74.

Maximum heat output:  
To boiler 2.0kW (6,800 BTU's)  
To room 2.0kW (6,800 BTU's)  
Total 4kW (13,600 BTU's)

(A) and (B) Tapping points for boiler options.

## Brunel 2CB

Weight: 90kg

Connects with 5" flue pipe using:

Size	With door	Without door
1' straight	4504	4500
2' straight	4505	4501
3' straight	4506	4502
1' 3" – 2' 1" (telescopic)		4542
3' 4" – 4' 6" (telescopic)		4540
Tee piece with end cap		4516

For coloured enamel flue pipe codes see page 74.

## Brunel 3CB

Weight: 120kg

Connects with 6" flue pipe using:

Size	With door	Without door
1' straight	4604	4600
2' straight	4605	4601
3' straight	4606	4602
1' 3" – 2' 1" (telescopic)		4642
3' 4" – 4' 6" (telescopic)		4640
Tee piece with end cap		4616

For coloured enamel flue pipe codes see page 74.

The flue pipe connects your stove to the existing/new chimney system. The chimney system must meet the requirements of Building Regulations (Document J) and the stove fitted in accordance with the detailed installation instructions provided with each unit. You may also download these instructions prior to purchase from [www.stovax.com](http://www.stovax.com).

## Stockton 7

Weight: 130kg

Connects with 6" flue pipe using:

Size	With door	Without door
1' straight	4604	4600
2' straight	4605	4601
3' straight	4606	4602
1' 3" – 2' 1" (telescopic)		4642
3' 4" – 4' 6" (telescopic)		4640
Tee piece with end cap		4616

Clip-in Boiler  
Maximum heat output:  
To boiler 3.5kW (12,000 BTU's)  
To room 3.5kW (11,800 BTU's)  
Total 7kW (23,800 BTU's)

## Stockton 7 Inset Convector

Weight: 120kg

Connects to register plate, flexible flue liner or flue pipe. See installation instructions.

## Stockton 7HB Inset Boiler

Weight: 130kg

Connects to register plate, flexible flue liner or flue pipe. See installation instructions.

Maximum heat output:  
To boiler 7.4kW (25,200 BTU's)  
To room 4.0kW (13,600 BTU's)  
Total 11.4kW (38,800 BTU's)

The information on these pages is to assist you in your choice of a suitable Stovax stove. This is not intended to be all the information required for installation. This information, along with minimum distances to combustible materials, can be obtained from your local Stovax retailer or you can download the full installation instructions from the website at [www.stovax.com](http://www.stovax.com).

Weight: 90kg

Stockton Milner

Fits into existing Milner fireback. See installation instructions.

Weight: 120kg

Stockton 8

Connects with 6" flue pipe using:

Size	With door	Without door
1' straight	4604	4600
2' straight	4605	4601
3' straight	4606	4602
1' 3" – 2' 1" (telescopic)		4642
3' 4" – 4' 6" (telescopic)		4640
Tee piece with end cap		4616

Maximum heat output for single and 2 door with 'clip-in' boiler:  
To boiler 4.4kW (15,000 BTU's)  
To room 3.6kW (12,200 BTU's)  
Total 8kW (27,200 BTU's)

Maximum heat output for single and 2 door with integral boiler: \*  
To boiler 4kW (13,600 BTU's)  
To room 4kW (13,600 BTU's)  
Total 8kW (27,400 BTU's)  
\* Whilst stocks last

Weight: 120kg

Stockton 8 Slimline 2 Door

Connects with 6" flue pipe using:

Size	With door	Without door
1' straight	4604	4600
2' straight	4605	4601
3' straight	4606	4602
1' 3" – 2' 1" (telescopic)		4642
3' 4" – 4' 6" (telescopic)		4640
Tee piece with end cap		4616

# Dimensions and Flue Pipe

Flue pipe connects your stove to the existing/new chimney system. The chimney system must meet the requirements of Building Regulations (Document J) and the stove fitted in accordance with the detailed installation instructions provided with each unit. You may also download these instructions prior to purchase from [www.stovax.com](http://www.stovax.com).

## Stockton 8 Double Sided

Weight: 120kg

Connects with 6" flue pipe using:

Size	With door	Without door
1' straight	4604	4600
2' straight	4605	4601
3' straight	4606	4602
1' 3" – 2' 1" (telescopic)		4642
3' 4" – 4' 6" (telescopic)		4640
Tee piece with end cap		4616

## Stockton 8 Inset Convector

Weight: 120kg

Connects to register plate, flexible flue liner or flue pipe. See installation instructions.

## Stockton 8HB Boiler

Weight: 140kg

Connects with 6" flue pipe using:

Size	With door	Without door
1' straight	4604	4600
2' straight	4605	4601
3' straight	4606	4602
1' 3" – 2' 1" (telescopic)		4642
3' 4" – 4' 6" (telescopic)		4640
Tee piece with end cap		4616

Maximum heat output:  
To boiler 8.2kW (28,000 BTU's)  
To room 4.9kW (16,700 BTU's)  
Total 13.1kW (44,700 BTU's)

The information on these pages is to assist you in your choice of a suitable Stovax stove. This is not intended to be all the information required for installation. Stockton 11

Connects with 7" flue pipe using:

Size	With door	Without door
1' straight	4704	4700
2' straight	4705	4701
3' straight	4706	4702
1' 3" – 2' 1" (telescopic)		4742
3' 4" – 4' 6" (telescopic)		4740
Tee piece with end cap		4716

Clip-in Boiler  
Maximum heat output for single and 2 door:  
To boiler 7.1kW (24,000 BTU's)  
To room 3.1kW (10,500 BTU's)  
Total 10.2kW (34,500 BTU's)

Stockton 11 Double Sided

Connects with 6" flue pipe using:

Size	With door	Without door
1' straight	4604	4600
2' straight	4605	4601
3' straight	4606	4602
1' 3" – 2' 1" (telescopic)		4642
3' 4" – 4' 6" (telescopic)		4640
Tee piece with end cap		4616

Stockton 11HB Boiler

Connects with 6" flue pipe using:

Size	With door	Without door
1' straight	4604	4600
2' straight	4605	4601
3' straight	4606	4602
1' 3" – 2' 1" (telescopic)		4642
3' 4" – 4' 6" (telescopic)		4640
Tee piece with end cap		4616

Maximum heat output:  
To boiler 11.0kW (37,500 BTU's)  
To room 7.0kW (23,900 BTU's)  
Total 18.0kW (61,400 BTU's)

# Dimensions and Flue Pipe

Flue pipe connects your stove to the existing/new chimney system. The chimney system must meet the requirements of Building Regulations (Document J) and the stove fitted in accordance with the detailed installation instructions provided with each unit. You may also download these instructions prior to purchase from [www.stovax.com](http://www.stovax.com).

## Stockton 14HB Boiler

Weight: 215kg

Connects with 6" flue pipe using:

Size	With door	Without door
1' straight	4604	4600
2' straight	4605	4601
3' straight	4606	4602
1' 3" – 2' 1" (telescopic)		4642
3' 4" – 4' 6" (telescopic)		4640
Tee piece with end cap		4616

Maximum heat output:  
To boiler 15.0kW (51,200 BTU's)  
To room 7.0kW (23,900 BTU's)  
Total 22.0kW (75,100 BTU's)

## Professional XQ Chimney Systems

Stovax also offer a comprehensive range of stove & fireplace chimney systems, the Stovax Professional XQ collection. Crafted from 304L grade stainless steel for a durable outer finish, the fully sealed components offer water tight protection for the insulation within.

With innovative decorative options, the ability to specify a colour for your system and with a host of technical advancements such as their Twist-Lock system, the Professional XQ range provides an attractive, versatile and reliable solution for your flue system. Furthermore, the Professional XQ range carries a 10 year conditional warranty offering complete peace of mind.

For further information or to request a brochure, simply contact your local retailer or visit [www.stovax.com/chimneysystems](http://www.stovax.com/chimneysystems).

### Brochure Photography

All of the flame pictures shown in this brochure are taken from real fires. Please note however that flame pictures will vary depending on the exact fuel used, flue conditions and surrounding geographical features. Some of the photography in this brochure may not comply with the latest Building Regulations and you should always check your proposed installation with your HETAS installer before proceeding. Certain settings in this brochure are dependant on the use of heat shields to reduce temperatures on combustible materials within defined distances as set by the Building Regulations.
